

Model YS-6, 60, 600 Dead-Weight Pressure Tester

Purpose

In 1980, Model YS-6, YS-60, YS-600 dead-weight pressure testers were awarded the state silver medal. And in 1987, after re-examination, we still hold the state silver medal

These testers are used in laboratory and measuring department for calibrating the precision pressure gauges or standard pressure gauges

Specifications

Accuracy: 0.05%

To order, specify the name, model and accuracy.
